

$$\partial_t \frac{\partial V}{\partial \chi} =$$

The diagram on the right represents a Feynman diagram. It consists of a horizontal line on the left that terminates at a solid black dot. From this dot, a wavy line forms a loop. Two arrows on the wavy line indicate a clockwise direction of flow. The top arrow is labeled with the variable q , and the bottom arrow is also labeled with q . The loop is closed by a vertex on the right, which is depicted as a circle containing an 'X' symbol.
